Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Higher Mathematics for Chemical Students Natural Science is that branch of knowledge which is concerned with the complete investigation of what we may call the outer world, as distinguished from consciousness. The constant succession of our experiences we attribute to concomitant change in the objects of experience; we recognize the existence of phenomena. The succession of phenomena, on careful investigation, is found to have one predominating peculiarity; phenomena are related in experience. They do not pass unconnected, or in random fashion, as though due to a fortuitous concourse of atoms ; they are, on the contrary, distinctly connected. It is this relation of phenomena which gives a definite meaning to science. By reason of past experiences, either individual or those preserved in the progress of the race, we are able more or less to foretell the future course of phenomena; we form an expectation of a connexion between possible experiences, which Ostwald identifies with a so-called law of nature. We have no guarantee that the expectation will be fulfilled; all we can say is that in every case observed up to the present it has been fulfilled, and the probability is very great that the connexion will also appear in the next case which comes under our observation. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
