aPress, United States, 2009. Paperback. Book Condition: New. 3rd Revised edition. 234 x 180 mm. Language: English . Brand New Book. 3.5 is the latest version of Microsoft s revolutionary technology. It is the principal standard for creating dynamic web pages on the Windows platform. Pro 3.5 in C# 2008 raises the bar for high-quality, practical advice on learning and deploying Microsoft s dynamic web solution. This new edition is updated with everything you need to integrate Silverlight 2.0 and SQL Server 2008 into your applications. You will learn about Silverlight s exciting new features so that your ASP projects can be rich in visual flair and compelling to the user. Seasoned professionals Matthew MacDonald and Mario Szpuszta explain how you can get the most from this groundbreaking new technology. They cover 3.5 as a whole, illustrating both the brand-new features and the functionality carried over from previous versions of ASP. This book will give you the knowledge you need to code real 3.5 applications in the best possible style. This book will teach you 3.5 starting with core concepts before moving on to more advanced topics. You will learn *Core concepts of 3.5. Why it s special. What its fundamental principals are. The basics of Visual Studio. How 3.5 controls are created, and how they fit into 3.5 pages, ultimately creating full applications. *Security. Once considered the Achilles heel of all Windows web applications, security has vastly improved and is a cornerstone of 3.5. This book explains the various forms of available security and how to best apply them. * Taking things further using advanced user interface techniques. This includes user controls, customer server controls, client-side JavaScript, and GDI+. *Web services. In an increasingly connected world, working with web services grows in importance. This book will show you how...
