

## Modeling of Turbulence Generated Noise in Jets

Filesize: 8.2 MB

### ***Reviews***

*I actually began looking over this pdf. it was actually writtern really perfectly and valuable. You will not really feel monotony at at any moment of your respective time (that's what catalogs are for about if you check with me).*

## MODELING OF TURBULENCE GENERATED NOISE IN JETS

To download **Modeling of Turbulence Generated Noise in Jets** PDF, make sure you click the link beneath and download the file or get access to additional information which might be relevant to MODELING OF TURBULENCE GENERATED NOISE IN JETS ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 242 x 182 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.A numerically calculated Green s function is used to predict jet noise spectrum and its far-field directivity. A linearized form of Lilley s equation governs the non-causal Green s function of interest, with the non-linear terms on the right hand side identified as the source. In this paper, contributions from the so-called self- and shear-noise source terms will be discussed. A Reynolds-averaged Navier-Stokes solution yields the required mean flow as well as time- and length scales of a noise-generating turbulent eddy. A non-compact source, with exponential temporal and spatial functions, is used to describe the turbulence velocity correlation tensors. It is shown that while an exact non-causal Green s function accurately predicts the observed shift in the location of the spectrum peak with angle as well as the angularity of sound at moderate Mach numbers, at high subsonic and supersonic acoustic Mach numbers the polar directivity of radiated sound is not entirely captured by this Green s function. Results presented for Mach 0.5 and 0.9 isothermal jets, as well as a Mach 0.8 hot jet conclude that near the peak radiation angle a different source/Green s function convolution integral may be required in order to capture the peak observed directivity of jet noise.
